Foreword

Dr. Laknath Welagedara Chairman

The National Dangerous Drugs Control Board (NDDCB) is the pioneer and the apex body for drug abuse management in Sri Lanka. It co-ordinates drug prevention, treatment and rehabilitation, enforcement, research, precursor control and other activities aimed at reducing harm from dangerous drugs and its eventual eradication.

The NDDCB, as the premier nationl institution for drug control, has laid the foundation for number of new programmes under the nationl vision to create a drug free country in accordance with the government policy statement. One of the major activities performed in this regard is the dissemination of relevant information and current status to the governmental, non-governmental sector and the general public, regarding the harmful effect of the drug menace.

This volume of "Handbook of Drug Abuse Information" has been compiled with a view to disseminate drug related information collected from various sources as a single document to bring to the public eye the enormity of the problem, and to get their co-operation towards the effort made to eradicate the same. It's more effective to take an evidance based approach in Drug Control Programmes and this hand book can be used as a related source.

The Board has made every endeavor to accomplish the most recent information in this publication. I wish to thank the staff of Research division of NDDCB who worked tirelessly to compile this document.

We always welcome your comments, suggestions and concerns of this document.

Preface

Bhadrani Senanayake Director General (Cover up)

The Handbook of Drug Abuse Information has been published with a view to gather drug related information available in various places in to single document. The first Handbook (1981-1989) was published by the National Dangerous Drugs Control Board (NDDCB) in 1991 and the second in 1994. While preparing the second handbook it was decided to update the book annually. The main objective of this handbook is to compile the annual information and statistics needed to manage the drug menace. Consolidation of such information helps to address the drug problem effectively and meaningfully.

I gratefully acknowledge the help and co-operation received from all the Law enforcement and other relevant agencies who kindly furnished the statistics requested.

It should be noted that information included in this book was done so on the basis of availability. I gladly invite, and would humbly accept all constructive criticism and suggestions on ways to improve the content of this handbook. I fervently hope that this book will become a standard work of reference in the field.

Treatment and Rehabilitation Services

The Government and Non-Governmental organizations are providing residential care treatment and rehabilitation services for drug dependents in Sri Lanka. Drug Dependents (treatment and rehabilitation) Act No. 54 was enacted in 2007 to implement compulsory treatment facilities. The NDDCB conducts four residential treatment & rehabilitation centres and outreach programmes for drug dependents. The centres of the NDDCB are located in Colombo, Kandy, Galle and Nittambuwa (Urapola).

The programmes of these centres provide individual and family counselling, which include detoxification treatment, physical exercises, mental relaxation, indoor and outdoor activities, psychotherapy, educational and vocational training, coping skills and motivation to develop healthy lifestyles. The reported number of clients treated for drug abuse Islandwide was 3613 in 2019.

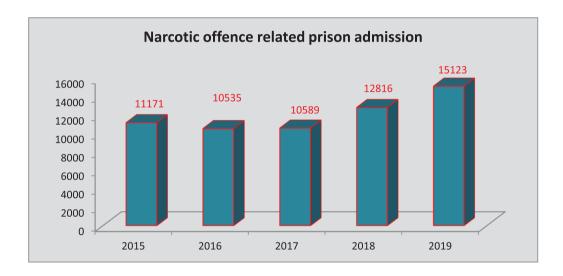

Among them, 1161 (32%) clients were from the treatment centres of the NDDCB, 681 (19%) were from Prisoner Diversion Scheme of the Department of Prisons, 735 (20%) were from the non-government organizations and 1036 (29%) were from Kandakadu Treatment and Rehabilitation Centre of Bureau of the Commissioner General of Rehabilitation. Majority (25%) of the clients were treated from Colombo district. 40% of rehabilitated persons were in age 30 and above. Treatment admissions have decreased in 2019 by 19% compared to that of 2018.

Treatment Admissions

Treatment admissions

Drug Abuse Monitoring System (DAMS) compiles records on treatment admission for substance abuse from government and non-governmental treatment agencies. The total number of reported drug users who had received treatment facilities during the year 2019 was 3,613 and compared to 2018 the number of drug users had decreased by 19%. Total number of treatment admissions was reported from NDDCB treatment and rehabilitation centres (32%), prisons drug treatment and rehabilitation programme (19%), NGOs (20%) and Kandakadu Treatment and Rehabilitation Centre of Bureau of Commissioner General of the Rehabilitation (29%).

The majority of reported drug users had received institutional treatment facilities and among the treatment admissions,

25% were from Colombo district. By considering the entire treatment admissions, 62% were from Western province. According to the reported data, 3.594 males and 19 females were admitted for the treatments in 2019 and in compared to the corresponding period of 2018 the number of male and female drug users had increased. Heroin remains the main drugs type which people receive treatment in the country. Among all the drug users entering drug treatment, majority were seeking treatment only for heroin use disorders except the use of secondary substances.

Precursor Chemicals Information

Precursor Chemicals

Precursors are generally used in various for industries licit purposes. traffickers divert these precursor chemicals illegally for production of illicit substances. Government of Sri Lanka has established measures to prevent diversion of precursor and essential chemicals in to the illicit manufacturer of drugs in accordance with the United Nations Convention against illicit traffic in narcotic drugs and psychotropic substances 1988. Under the convention International Narcotic Control Board (INCB) is monitoring government's control over precursors and chemicals used in the illicit manufacturer of drugs.

Convention against illicit traffic in narcotic drugs and psychotropic substances, Act No 01 of 2008 was enacted to control 23 precursor chemicals under the provisions of UN-Convention. The precursor Control Authority (PCA) was established in 25th of October 2010 as s subsidiary unit of National Dangerous Drugs Control Board, to enforce this act.

Sri Lanka does not manufacture precursor chemicals. Hence whichever substance required for pharmaceutical or industrial manufacturing processes must be imported and most of the precursor chemicals imported to Sri Lanka are used for industrial purposes. Major precursors imported in to the Sri Lanka during the 2019 were hydrochloric acid, sulphuric acid methyl ethyl ketone, piperonal. potassium permanganate, acetone and toluene. These precursor chemicals are known substantial produce synthetic drugs. Other highly addictive synthetic drugs that can be produced from aforesaid precursors are, Methaguolone, LSD, MDA/MDMA, amphetamine, methamphetamine.

According to the import and export information of precursor chemicals for 2019, highest imported quantities were reported for hydrochloric acid (3,857,185 kg) and sulphuric acid (3,457,144kg).

In order to control diversion of these chemicals for illicit production of drugs, PCA takes necessary actions such as issuing of licenses, inspection of permits and checking the stocks etc. More effective actions are in the pipeline to get fully control of such chemical within the country.

Sri Lanka Legislation Pertaining to Drugs

(1) Laws Regulating and Controlling Drugs

The Poisons, Opium and Dangerous Drugs Ordinance of 1935 which has undergone many amendments, most recently in 1984 (Act. No 13) is the principal statutory enactment regulating poisons, opium and dangerous drugs in the country.

National Dangerous Drugs Control Board Act. No:11 of 1984.

Other statues with provisions relating to drugs include:

The Penal Code (Ordinance No. 2 of 1983 as subsequently amended) in particular Chapter 14 which covers public health and safely.

The Cosmetics, Devices and Drugs Act (Act No. 27 of 1980, as amended by Act No. 38 of 1984) The Act regulates manufacture, sale, distribution, labelling and advertising of all commercial drugs.

The Ayurveda Act (Act No. 31 of 1961 as amended by Act No. 5 of 1962) entitles ayurvedic physicians to, obtain opium and ganja for manufacture of their medicinal preperations.

The Customs Ordinance (Ordinance 17 of 1869, imposes prohibitions and restrictions of both import and export of substans prohibited under the Poisons opium and Dengerous Drugs ordinance;

The Excise ordinance of No: 12 of 1912

Drug Dependent Persons (Internal and Rehabilitation) Act, No 54 of 2007

Conventions Against Illicit Trafficking in narcotic drugs and psychotropic substances act. No. 1 of 2008

National Authority for Tobacco & Alcohol Act. No: 27 of 2006

Coast Guard Act No: 41 of 2009

(2) Drug Related Acts or Behaviours Considered as Crimes

The standard drug associated arrests are for trafficking, sale and possession. Under the Poisons, Opium and Dangerous Drugs Ordinance acts considerd crimes include possession consumption and manufacture of illicit drugs (including any process in producing, refining or transforming them.) Also it is a crime to sell, give, obtaine, procure, store, administer transport, send, deliver, distribute, traffic, import or export such drugs and aid or abrit in the commission of such offences.

(3) Punishments

The penalties for drug offences now range from fines to death or life imprisonment. The penalty of death or life imprisonment accrues for manufacture of heroin, cocaine, morphine or opium and the trafficking, possessions, import or export of a minimum amount of (a) 500 grams of opium (b) 3 grames morphine (c) 2 grams of cocaine or (d) 2 grams of heroin. Less severe offences including the regulatory ones warrant sentences of fines or imprisonment, the amount of the fine or the length of imprisonment depends on the quantity of drug, the gravity of the offence and the courts having jurisdiction.

Official Drug Control in Sri Lanka

Drug Control Agencies: The agencies actively involved in eforcement are the Police, Customs and Excise Departments, while the Ministry of Health overseas the entry of controlled substance into the country. The National Dangerous Drugs Control Board formulates national policy and plays its role in supporting and co-ordinating the effrots of various drug control agencies while modifying policy to meet the changing needs of drug control efforts.

I) Police Department - The Police is vested with more powers than other agencies under exisiting law with regard to illegal drugs. The police is the premier enforcement agency handling drug law enforcement. This is carried out through the 401 police stations in the island which have drug law enforcement, as part of their responsibilities.

The Police Narcotics Bureau (PNB), a specialized central unit, is headed by a director and coordinates drug enforcement functions of all police stations. The PNB also investigates major drug cases, responds to international requests in regard to drug law enforcement and is a repository of statistics. The PNB is also involved in training of drug law enforcement officers both within the police and in allied agencies. They also use trained drug detector dogs and also undertake some public awareness and preventive education programmes.

- ii) Sri Lanka Customs The Customs Department, headed by a Director General Controls exit and entry points in the island. Drugs which are prohibited or restricted from import or export under the Poisons, Opium and Dangerous Drugs Ordinance are also prohibited or restricted from import or export under the Customs Ordinance. The Customs has Baggage Division under a director and in response to the increasing problem the Customs have a Preventive Division under a director with a specialised Narcotics Unit which works inclose liaison with the PNB who handle the case once the detection is made
- **iii) Department of Excise -** This Department headed by a Commissioner is vested with powers under the Poisons, Opium and Dangerous Drugs ordinance [Section 77 (3)] and the Code of Criminal Procedure Act, No. 15 of 1979 [Section 136 (b)] to undertake drug law enforcement and they have a specialised unit for this purpose which co-ordinates the efforts of the other units which are spread throughout the country and work in close collaboration with other drug law enforcement agencies
- **iv) Ministry of Health -** The Health Ministry which enforces the Cosmetics, Devices and Drugs Act, imports all legal requirements of narcotic substance and methly phenidate for medical and scientific purposes through the Director, Medical supplies Division under the ulitimate authority of the Director General of Health Services (DGHS). Other psychotropics are imported by the State Pharmaceutical Corporation or other private licensed importers (about 25 in number) who receive their licenses through the Director. Medical Technology and supplies Division acting on behalf of the DGHS and under whose immediate purview the Medical Supplies Division falls. The Minister of Health is empowered to make regulations for the purposes of giving effect to the Provisions of the Poisons Opium and Dangerous Drugs and Ordinance.
- v) Courts Both magistrates and high courts hear drug related cases under the existing law. However, the sentences passed vary considerably and no research has been done to find out the

rationale of sentences handed out. Though no express provision exists in the current law, occasionally a court is seen to direct youthful offenders to seek treatment and rehabilitation in place of incarceration.

- vi) Correctional Institutions The prisons system, under a Commissioners, represents a passive enforcement, coming into effect only once a suspect is convicted. Their statistics indicate that those imprisoned for narcotics offences now comprise the single largest category of the total inmates 29% in 2016. A drug Treatment and Rehabilitation centre was conducted by the Bureau of the Commissioner General of Rehabilitation at Kandakadu.
- **vii)** National Dengerous Drugs Control Board (NDDCB) is the national institution charged with the formulation and review of a national policy on drugs. In view of its role in treatment and rehabilitation and preventive education the NDDCB, a statutory Board and headed by a chairman, is not directly invovled with day to day enforcement activities. However, enforcement is coordinated by the NDDCB through its Sub-Committee on Enforcement.

Role of the National Dangerous Drugs Control Board in Prevention and Control of Drug Abuse in Sri Lanka

Establishment of NDDCB

The National Dangerous Drugs Control Board (NDDCB) which was established by the National Dangerous Drugs Control Board Act No.11 of 1984, is the principal national institution charged with the formulation and review of a National policy relating to the prevention, control treatment and rehabilitation of drug abuse. This Board is the pioneer Government Institution that discharges its functions with the aim of eradicating drug menace from Sri Lanka.

Role of the NDDCB

In terms of the Sri Lanka National Policy for Prevention and Control of Drug Abuse, NDDCB plays a pivotal role at National and International level with regard to prevention and control of narcotic drugs, psychotropic substances abuse and precursor chemicals. NDDCB has been designated as the focal point for control of Narcotic drugs and Psychotropic substances in Sri Lanka in terms of International Conventions.

International Relations

NDDCB ensures the availability of internationally controlled substances for medical and scientific purposes and in the case of precursor chemicals, to ensure their legitimate industrial use and preventing the diversion of controlled substances into illicit drug market.

In order to acieve above objective, NDDCB, being the National Focal point, work closely with the International Narcotic Control Board (INCB), Commission on Narcotic Dugs (CND) and the United Nations Office on Drugs and Crime (UNODC), the main UN agencies involved in International Drug Control.

NDDCB ensure implementation of the following International Conventions, additional control measures adopted by the Economic and Social Council and the Commission on Narcotic Drugs to enhance their effectiveness and bilateral agreements.
