Introduction

The general objective of the Drug Abuse Monitoring System (DAMS) is to establish a sound database for effective programme planning and monitoring. Specific objectives of the reporting system are as follows:

- To determine the incidence, prevalence and characteristics of drug users who reported to treatment and rehabilitation services.
- To monitor the trends and patterns of drug use.
- To determine and describe at risk groups in the population.
- To assess and evaluate the existing treatment and rehabilitation programmes.
- To be an ‘early warning system’ for effective programme implementation.

This analytical report is based on the information reported from government and Non government treatment services to the DAMS during the year 2021.

Information on treatment admissions are comprised under following ‘indicators’.

- a. Demographic characteristics
- b. Drug use
- c. Route of use
- d. Frequency of drug use
- e. Age at first use
- f. The primary drug used
- g. Treatment method
- h. Types of admission
- i. Nature of drug offence

Research Division

Abstract

The total number of reported drug users who had received treatment services for the year of 2021 was 1,703. Of the total reported drug users, 44% received treatment from the treatment and rehabilitation center of National Dangerous Drugs Control Board (NDDCB). 07% from prisons drug treatment rehabilitation programme, 15% from NGOs and 35% from Kandakadu Treatment and Rehabilitation Centre of Bureau of Commissioner General of Rehabilitation (BCGR). Compared to year 2020, total drug treatment admissions were increased in 2021.

Treatment and rehabilitation services have been regulated and monitored by the National Dangerous Drugs Control Board in terms of the provisions of act No: 54 of 2007; drug dependent persons treatment & Rehabilitation act.

The majority of reported drug users had received institutional treatment facilities and among the treatment admissions, 32% were from Colombo district. By considering the entire treatment admissions, 66% were from Western province.

According to the reported data, 1,699 males and 04 females were admitted for the treatment services in the year 2021.

Among the total drug users 27% administrated drugs by smoking, 09% by eating or drink and 58% used Chinese method. It is also revealed that 987 (58%) of drug users were single and 531 (31%) were married. Data further indicates that 458 (27%) of them have studied grade 5 to 10 and 812 (48%) persons completed O/L examination.

Background

This is an analytical report based on the Drug Abuse Monitoring System (DAMS) on persons treated in drug treatment facilities during the year 2021.

One thousand seven hundred and three (1,703) drug dependents have been reported from drug treatment and rehabilitation centres during the year 2021. 751 (44%) persons were reported from the NDDCB treatment centers, 249 (15%) from NGOs, 111 (07%) from prison drug treatment programmes and 592 (35%) from Kandakadu treatment and rehabilitation Centre.

Figure 01: Distribution of treatment admissions

Source: Drug Abuse Monitoring System, 2021

NGOs sector had provided treatment services for 249 drug users and out of them, 94 from Nawajeewana treatment centre, 35 persons from miduma treatment centre and 23 persons from Mithuro Mithuro Treatment centre.

Type of Admission

The distribution of admission types is shown in table 01 and it reveals that majority (848) was from voluntary admissions. Court referral admissions were reported 730 persons.

Table 01

Type of Admission	Number of persons	Percentage (%)
Voluntary	848	50
Court referral	730	43
Other	46	03
Not report	79	04
Total	1,703	100
